Covid vaccine update 1/16/21

We have administered the last dose of our current supply of vaccine and have no more until the state releases another shipment. These are challenging times, and with Covid cases on the rise, we understand you may feel scared and anxious. We hear you. We are frustrated too! Gratefully, a new national vaccine distribution strategy is on the horizon next week and we will administer vaccines as quickly as we can get them. In the meantime, continue to your part to keep the community safe. Wear a mask, wash your hands frequently, and stay home whenever possible. Thank you for your patience and understanding and for your support during these difficult times.
